PROFILE

I am an ambitious IT graduate with demonstrated strength in analytical thinking, data systems, and Decision Support Systems. I'm currently completing a BSc Honours in Computer Science and Information Technology at North-West University (NWU). Academic foundation spans decision support systems, data warehousing, databases, AI, and information security. My disciplines directly aligned with the demands of any IT internship or graduate program. I am Eager to apply structured problem-solving and technical rigor within a high-performing team environment

WORK EXPERIENCE

DEPARTMENT OF BASIC EDUCATION- GITO, ICT INTERN (VAC WORK)
2024 JUNE-2024 JULY

University-based practical internship under the Government IT Officer, gaining exposure to enterprise IT systems and data infrastructure such as Education Management Information System (EMIS) and South African School Administration System (SA-SAMS). Developed understanding of data governance, security policies, and IT infrastructure in a government environment.

PROJECTS

LOAN MANAGEMENT SYSTEM
2024 (Full Year)

End-to-end system for managing loan records, borrower data, and repayment tracking — requiring rigorous data modelling, logic design, and analytical thinking. •Applied database design (SSMS), object-oriented programming (C#), and systems analysis methodologies.

INTERNAL TEXT MESSAGING APPLICATION

ADDRESS

10556
EXT 17 Bophelong
Muvhango

South Africa

EDUCATION

**BACHELOR OF SCIENCE IN
INFORMATION TECHNOLOGY**
2023 – 2025

North-West University (NWU),
Potchefstroom Campus

KEY MODULES: *Artificial Intelligence,
Decision Support Systems, Databases,
IT Developments, Structured & Object-
Oriented Programming*

COMPLETED (GPA: 70)

**BSC HONOURS IN COMPUTER
SCIENCE AND INFORMATION
TECHNOLOGY**

2026 – In progress

North-West University (NWU),
Potchefstroom Campus

RESEARCH TOPIC: Implementing
Management Science into
administrative systems.

KEY MODULES: *Data Warehouses,
Databases, Information Systems
Engineering, Decision Support Systems,
Research*

2025 (Half-Year)

Designed and built a secure, database-backed corporate communication application — covering requirements analysis, architecture design, and implementation.

CREDIT CARD FRAUD MONITORING (STREAM PROCESSING)

2026 (Half-Year)

Designed and built a stream pipeline of transaction events — Used Microsoft Azure to facilitate stream analytics and Power BI for data visualization.

SKILLS

Data and Analytics (SQL Server, Azure Stream Analytics, Power BI)
Programming: Python, C#, Java, JavaScript
AI and System Analysis
Tool utilization: SSMS, AI, MS AZURE
Communication

CORE STRENGTHS

Critical Thinking
Digital Guru
Leader by Nature
Attention to Detail
Problem solver
Adaptability & Continuous Learning
Customer-centric
Teamwork & Collaboration
